

Anvarbek Xaydarov

Full Stack Developer

I'm continuing my seo now

Experience

2022 - Past

Fullstack Enterprise Resource Planning(ERP) - Designed, developed, and maintained full-stack ERP system applications, optimizing business processes and enhancing productivity.

- [YouTube demo intro](#)
- [GitHub project code](#)

2023 - Present

Fullstack ecommerce shop app - As the lead developer for a dynamic e-commerce platform, I engineered a visually captivating and SEO-optimized marketplace with user-centric and admin-friendly features.

- [GitHub project code and demo](#)

2023 - Present

Interactive Social Media Platform - Engagement at Its Best: Users can express their appreciation for each post with a simple click of the "Like" button, fostering a sense of community and connection. Thoughtful Discourse: Encouraging meaningful conversations, the platform allows comments on each post, creating an engaging environment for sharing thoughts and ideas. Nested Conversations: Dive deeper into discussions with nested comments, making it easy to follow and contribute to multi-layered conversations. Seamless Authentication: Users can join the community effortlessly with the choice of Google, GitHub, or custom credentials for a personalized and secure experience. Rendering Options: Whether it's lightning-fast client rendering for snappy interactions or server rendering for SEO optimization, the platform adapts to deliver the best performance. User Protection: User data is safeguarded, ensuring privacy and security are paramount, enhancing user confidence. Admin Empowerment: Admins have role-based control, with middleware ensuring smooth and effective management of the platform. This project offers a vibrant and inclusive social media space with features designed to foster connection, facilitate meaningful discussions, and prioritize user satisfaction and security.
